Oracle JD Edwards

The link between our solutions and Oracle JD Edwards offers organisations a powerful way to streamline financial processes and procurement management. Using the JD Edwards APIs creates a seamless link that synchronises data in real time. This ensures optimised workflows, fewer manual tasks and greater control over financial commitments.

The benefits at a glance

Efficiency improvements
Automation of time-consuming tasks such as matching and invoice processing.

Compliance
Ensure legal compliance through automatic data synchronisation.

Real-time insight
Always access up-to-date data for better decision-making.

Fraud prevention
Tighter control and reduced risk of incorrect payments.

Real-time integration
Automatically synchronises master data, financial entries, orders and receipts.

Unburdening
Automating processes creates more space to focus on strategic tasks.

ORACLE JD EDWARDS

- JD Edwards API's
- JD Edwards Master data
- JD Edwards Database

PO data
- PO data (2&3-way)
- Goods receipts (partial)

Master data
- Legal entities

Functionalities Oracle JD Edwards integration

1

Real-time synchronisation with JD Edwards APIs

Using JD Edwards APIs, data is exchanged accurately and directly. This includes:

- **Master data:** Synchronisation of legal entities, suppliers, business units, general ledger accounts, VAT codes and payment terms.
- **PO data:** Support for 2-way and 3-way matching and (partial) goods receipts, ensuring more efficient processing of purchase orders.

This data exchange lays a solid foundation for streamlined financial management and greater insight into operational processes.

2

AP Automation

Our solution streamlines the processing of both PO and non-PO invoices. Features such as voucher logging, matching, cancellation (voiding), redistribution and release for payment automate the entire invoice process.

- **Invoice data:** Digital processing eliminates manual checks and speeds up approval and payment processes.

"ISPnext is the only one with a standard interface with JD Edwards. That made the choice easy."

- Fred van de Wiel, Teamlead Finance to Manage | DPD

3 Single Source of Truth (SSOT)

With automatic synchronisation of master data and invoice entries, SSOT is maintained in the ERP system. This ensures consistent financial reporting and prevents errors, fraud and incorrect payments. Approvers work directly from ISPnext, avoiding additional Oracle JD Edwards licence fees.

Conclusion

ISPnext integrates seamlessly with Oracle JD Edwards, both on-premise and in the cloud. With real-time synchronisation of master data, bookings, orders and receipts, you optimise financial processes, reduce your administrative burden and minimise errors. Thanks to up-to-date and insightful data, you work more efficiently, compliantly and strategically, while keeping full control over your expenses and liabilities.
