SAP S/4HANA Cloud Public

Discover the Value of your Spend

SAP S/4HANA Cloud Public

The integration between our solutions and SAP S/4HANA Cloud Public offers a powerful and future-proof approach to optimising financial processes and procurement management. Thanks to a direct link via SAP APIs, data is synchronised in real time. This results in more efficient workflows, fewer errors and better regulatory compliance.

The benefits at a glance

Efficiency improvement
Automation of time-consuming tasks such as matching and invoice processing.

Cost savings
Reduction of administrative burden through process optimisation.

Real-time insight
Always access up-to-date data for better decision-making.

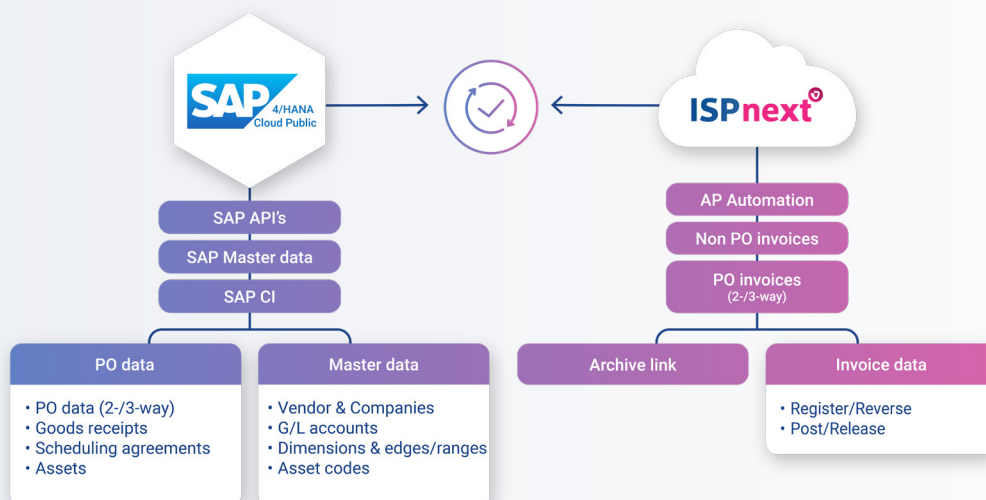

Fraud prevention
Tighter control and reduced risk of incorrect payments.

Real-time integration
Automatically synchronises master data, financial entries, orders and receipts.

Unburdening
Automating processes creates more room for focus on strategic tasks

Functionalities SAP S/4HANA Cloud Public integration

1

Advanced data exchange via SAP APIs

Our integration with SAP S/4HANA Cloud Public uses APIs to exchange data accurately and in real time. This ensures seamless synchronisation of essential data, such as:

- **Master data:** Suppliers, companies, general ledger accounts, financial dimensions and assets such as asset codes.
- **PO data:** Processing purchase orders with 2-way and 3-way matching, goods receipts, scheduling agreements and asset management.

This link allows organisations to centrally manage and easily access their financial and operational data.

2

AP Automation

Our solution fully automates the invoice processing process. Both PO and non-PO invoices are handled digitally, minimising manual checks and increasing efficiency. Thanks to real-time integration, processes run faster and errors are reduced.

- **Invoice data:** Features such as Register/Reverse and Post/Release ensure faster turnaround times and reduced risk of errors.

“ISPnext has a nice client portfolio and enough knowledge and expertise to get the job done successfully.”

- Harold Roeland, **Business Controller | Asia Express Food**

3

Single Source of Truth (SSOT)

With automatic synchronisation of master data and invoice entries, SSOT is maintained in the ERP system. This ensures consistent financial reporting and prevents errors, fraud and incorrect payments. Approvers work directly from ISPnext, avoiding additional SAP licence costs.

Conclusion

Our advanced integration with SAP S/4HANA Cloud Public, automates financial processes with real-time synchronisation of data, minimises errors and fraud, and ensures compliance. This increases efficiency and gives finance departments more scope for strategic tasks, while organisations always have up-to-date and insightful data for optimal control and growth.
